Woodville Highway  
Corridor  
Alternatives  
Meeting

Monday, February 28, 2011  
5:30 pm to 7:00 pm

## Project Description

The CRTPA, assisted by Kimley-Horn and Associates, is developing a Corridor Master Plan for the segment of Woodville Highway from Capital Circle Southeast to Gaile Avenue.

The Corridor Master Plan will include recommendations related to land uses, environmental features, community and social features, and general engineering constraints that will shape the current and future transportation needs of the corridor. The CRTPA's project team continues to involve the community in the development of the Master Plan, so that community needs and concerns are best captured. The Corridor Master Plan is anticipated to be completed later this spring.

## Corridor Alternatives Meeting

The Corridor Alternatives Meeting is being held to allow the project team to present the draft Master Plan recommendations to the public. Over the past several months, the project team has worked to refine the recommendations that the community helped develop during the Concept Charrette held last fall into draft elements of the Master Plan. At the Corridor Alternatives Meeting, the project team will present these draft elements and listen to the comments and questions that the community members have about the concepts. Following the meeting, the concepts will be finalized and developed into a Master Plan for the corridor.
