

FSU MATH FUN DAY

FSU MATH FUN DAY

Saturday, October 14, 2017

held in the Department of Mathematics, Love Building,
1017 Academic Way, FSU Main Campus, Tallahassee

Activities 1-4 pm, Public Lecture 4-5 pm

We invite you to join the FSU Department of Mathematics for our next celebration of Mathematics! For all ages! Each year, over 60 faculty, staff, and student volunteers from the Department of Mathematics engage with the community to demonstrate their love of math and that MATH is FUN!

Come join us for this free event that includes hands-on activities, presentations, and workshops for the general public, including students and teachers. Activities are available for all ages in grades K-12.

Check out our Facebook or Web pages for event updates!
Guests are encouraged to pre-register! See our Web page!

Hands-on Activities and Workshops for All Ages: 1-4 pm

Public Lecture: 4-5 pm on Mathematics and Gerrymandering -- why redistricting is so difficult and how mathematics can help.

Speaker: Dr. Erika Ward, Assistant Professor of Mathematics, Jacksonville University

Information: How we group people to elect representatives has a tremendous effect on who gets elected. How does the process work? How does Gerrymandering happen? Find out what is being done about the problem, and some new tools mathematicians are developing to help out.

Public Lecture Level: Middle School, High School, and Above

For more information including pre-registration information, see our Web page:
