

SHAKE UP LEARNING Book Study

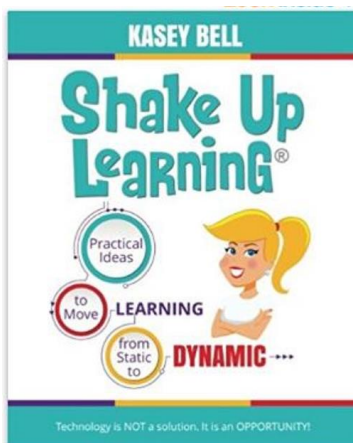

Practical Ideas to Move Learning from Static to Dynamic

October 8, 2018– March 29, 2019*

*Reading & task requirements are comfortably paced for busy teachers during this 20-week study.

Technology is not a magic solution for education. It is an opportunity to shake things up, to connect and grow, and to create dynamic experiences for our students.

This isn't a book about technology, Google, silver bullets, or pie-in-the-sky thinking. This is a book about

LEARNING!

If you want to increase student engagement, incorporate technology in the classroom, and unleash creative thinking in your students, join your colleagues in moving learning from static to dynamic.
