

FDLRS Proudly Announces A SIM Professional Learning Opportunity October 12–13, 2021

SIM Learning Strategies:

SIM encompasses more than 30 specific Learning Strategies that can help students overcome specific learning difficulties that impede literacy, from identifying words in a text to completing assignments on time to writing complete essays.

Students use SIM Learning Strategies--an approach to learning and using information--to help them understand information and solve problems. Students who do not know or use good learning strategies often learn passively and ultimately fail in school. SIM Learning Strategy instruction focuses on making students active learners.
